

Tab40C Tablet Charge Cart

When it comes to children, it's always "safety first." Tab40C features a fully-welded steel frame and smooth plastic covers, ensuring a safe learning environment without sacrificing superior structural integrity. With Tab40C you can store, secure and charge up to 40 tablets at one time and easily remove slot partitions to accommodate larger items. Put your mind at ease with the dependable and versatile Tab40C.

Round and sound

The cart's steel frame is welded into a complete metal skeleton (no screws!), after which the seams are smoothed to a round finish and covered in protective, eco-friendly plastic, leaving no exposed corners or sharp edges. The hinges on the steel double doors are cleverly placed on the inside of the doors to protect students from potentially serious bodily harm.

One size fits all

The 28mm-wide, 364mm-deep customizable charging slots give you the freedom to store a wide variety of tablets – with or without their protective covers. The partitions are easily removed to afford you greater flexibility when storing large items, such as AVer visualizers, while the repositionable cable clips make cabling relatively painless.

Charge fast. Charge safe.

Simultaneously charge up to 40 iPads, Android tablets or Windows® tablets to have them ready for students to use during a day of interactive lessons. What's more, teachers and technology specialists can sleep soundly knowing Tab40C is protected by the industry's only 5-year standard warranty for electrical components.

Secure your investment

The robust, fully-welded steel frame, steel double doors and three-point locking mechanisms found on both the front and rear doors of Tab40C make breaking into the cart a daunting task for any would-be thief. This level of security offers you something precious that money can't buy: peace of mind.

Take a load off

Decades of experience in education has taught us to appreciate the toll teaching takes on the body. With ergonomic handles, 4 AC courtesy outlets, painless cable management and remarkably quiet 5" medical-grade casters, Tab40C goes a long way to take the physical discomfort out of device management.
